Viewing your Marks and Feedback through Turnitin in the LMS

Introduction
Some unit coordinators mark assignments online through Turnitin in the LMS. This guide explains how to access your marks and feedback after a Turnitin assignment has been marked through the LMS.

Access your marks and feedback
There are two ways to access your marks and feedback:

Option 1: My Grades link
Some unit coordinators choose to include the My Grades link on the unit’s left-hand navigation menu. The exact location varies by unit.

In the My Grades area, you will see the unit’s assessments listed, along with marks for those that have been graded in the far right column. To access the full feedback, first, click on the title of the assignment.

Next, click on the ‘link’ icon (shown in the image to the right) to proceed to the Turnitin system to view your feedback and Originality Report (if available).

Option 2: Assignment submission link
Click on the link in the unit where you originally submitted the assignment.

Both of these options will lead you to the Turnitin Assignment Inbox tab, which displays all the information relating to your assignment submission(s).

1. To view the feedback on your assignment, click on the View button. Your assignment will open in a new window.

2. Click on the GradeMark tab. It will turn blue when it is selected, and the feedback from your marker will be displayed.
Viewing your Marks and Feedback through Turnitin in the LMS

The image below shows an example of a Turnitin GradeMark report.

Your marker may have typed comments directly on the paper. You may also see blue boxes with comments that will be expanded when you click on them.

On the bottom right side of the window, you can click on the buttons to view a list of all comments in your paper, overall comments, and the marking rubric (if one was used by your marker).

Click on the printer icon on the bottom left side of the screen to print or download the assignment with the marker’s comments.
